

# General-purpose drone port made in Japan

\*Planned to be waterproof

## For this purpose!

I want to perform fixed-point monitoring in a place where there are no surveillance cameras.

I want to monitor crop damage caused by people, birds and animals from the air.

I want to investigate traffic volume, but I want to pinpoint it without needing further construction work.

etc.

Usage image

Please let us know your ideas using drones, wired power supply, and drone ports.

## Wired power supply system

It can be used in conjunction with our wired power supply system and automatic cable winding device.
